Skills

Language Skills: Python, C++, C, Java, SQL, JavaScript, C#/.NET, R

Web Development: React, Node.js, Express.js, AngularJS, jQuery, HTML, CSS, Bootstrap

Big data & Cloud: Hadoop, Spark, Hive, Amazon Web Services, Azure

AI / ML: Machine Learning, Generative AI, LLMs, LangGraph, Scikit-learn, K-Means Clustering

Databases: MongoDB, MySQL, SQLite, Supabase, Prisma, Postgres

Tools & Concepts: Git, GitHub, Postman, Linux, REST APIs, Data Structures & Algorithms, OOP

Experience

Threds | *Software Development Intern*

May 2026 – Jul 2026

- Delivered **10+ production feature enhancements and bug fixes** across frontend and backend CRM modules.
- Refactored reusable UI components across **7+ modules**, improving maintainability and user experience.
- Added dynamic field support, optimized backend logic, and contributed through Git-based Agile development.

Tech Stack: React, TypeScript, Vite, TanStack Query, NestJS, Prisma, PostgreSQL, Better Auth, Git, GitHub environment.

Projects

Nutritrack

[Frontend](#) [Backend](#)

- Built a **full-stack nutrition tracking platform** with **6+ core features** including calorie tracking, water intake monitoring, diet goal management, and appointment booking with nutritionists.
- Designed and implemented **RESTful APIs** using Node.js and Express to manage user health data with **CRUD operations across 4+ MongoDB collections**.

Tech Stack: MongoDB, Express, AngularJS, NodeJS, JavaScript

SafeTrail: Your AI-Powered Travel Safety Companion

[GitHub](#)

- Developed an **AI-powered travel safety platform** that analyzes geospatial location data using **K-Means clustering** to identify high-risk areas.
- Integrated **Google Maps API and Google Directions API** to dynamically generate optimized navigation routes and visualize safety zones on interactive maps.

Tech Stack: Next.js, React, Tailwind CSS, TypeScript, GoogleAuth, MongoDB, Google Maps API, Google Directions API, Scikit-learn, Python

Synapse: AI-Driven Delivery Issue Resolution Platform

[GitHub](#)

- Designed an **intelligent logistics monitoring system** to analyze delivery data and customer complaints for detecting **3+ operational issues** including delays, route deviations, and failed deliveries.
- Implemented **LLM-based multi-step workflows using LangGraph** to automate issue classification and generate response suggestions for delivery resolution.

Tech Stack: Python, LangGraph, LLM APIs, HTML, CSS, JavaScript

Education

Vellore Institute of Technology (VIT)

B.Tech. in Information Technology

Aug 2023 – June 2027

CGPA: 8.97

Atreyee DAV Public School

CBSE Class 12th Board

April 2023

Percentage: 94%

Atreyee DAV Public School

CBSE Class 10th Board

April 2021

Percentage: 95.6%

Leadership

Vice Chairperson, IEEE TEMS VIT

Dec 2025 - Present

- Oversee operations and strategic planning for a **100+ member student chapter**, coordinating cross-domain initiatives across technical, editorial, and outreach teams.
- Lead and collaborate with **4+ functional teams** to organize **5+ technical events and workshops**, improving student engagement and participation.

AI/ML & Editorial Mentor, IEEE TEMS VIT

Jan 2025 - Dec 2025

- Mentored **30+ students** on AI/ML fundamentals through projects, technical sessions, and hands-on workshops.
- Led editorial and marketing initiatives, producing **10+ promotional and technical content pieces** for IEEE TEMS events, newsletters, and social media outreach.

Certifications & Achievements

GenAI, SmartBridge

[View Certificate](#)

Hands-on internship program exploring generative AI, prompt engineering, large language models (LLMs), and ethical AI practices using real-world tools certified from Google Developers.
